

### **Program Concept**

The theme for the 13<sup>th</sup> APRSCP is “Enabling SCP towards Achieving Green Growth”. This theme is based on enhancing sustainable development and addressing challenges of climate change through the following criteria

- Increasing Sustainable Consumption and Production (SCP) implementation to escalate Green Growth in the Asia-Pacific Region;
- Greater involvement of private sector participation for enhancing ownership of and championing SCP initiatives;
- Increase private-public partnerships in SCP for multi-stakeholder cooperative efforts in Green Growth and achieving SDGs;
- Integrating SCP with Sustainable Development Goals (SDGs) in Green Growth strategies, programs and action plans.

The supporting enablers and sub-themes are aimed at engaging industry and business, as well as decision-makers in the public and private sectors, to drive Green Growth, and are addressed in the parallel Roundtable sessions. These sub-themes are:

- Technology and Innovation – as enablers for green growth and sustainable business
- Green Financing – enabling green financing and reducing risks for financial institutions as well as business and industry
- Low Carbon Communities – enabling sustainable lifestyle toward low carbon cities and sustainable consumption
